Ceyo ürünlerinin büyük çoğunluğunda ayağın yapısına uygun hazırlanan ve doğal formunu koruyan özel anatomik taban tasarımı bulunmaktadır. Ayağın tabana temas eden arayüzünü artırarak, basınç noktalarındaki ağırlığı tabanın tüm yüzeyinde dağıtan, ayak ağrısı gibi şikayetleri azaltan özelliktedir.

Most of the Ceyo products have anatomical sole designs that are convinced in conformity with the foot structure, to keep its natural form. By increasing the contact points of the interface between the feet and the sole, the weight at pressure points is spread to a larger surface and thus foot pain or similar complaints are reduced.

Özel tasarımı tabandaki delikler suyun rahatça tahliyesini sağlar. Bu sayede ürün ve ayak çabuk kuruyarak, mantara neden olan nem ortadan kalkar, koku oluşumu engellenir.

Holes on the custom designed outsole enables the easy discharge of water. Thus the slipper and the feet dry quickly, the moisture causing fungus and hence the odor formation are prevented.

Tabanın üzerinde ayağa temas eden bölgede kullanılan EVA, antibakteriyel, darbe emici özelliklerde olup, kaymayan ve çabuk kuruyan iç taban malzemesi olarak tercih edilmiştir.

The EVA used in the insole is antibacterial, shock absorbing and preferred as a non-slip, quick-drying footbed material.

İç tabanda kullanılan EVA malzeme, kapalı hücre yapısı sayesinde darbeleri emmektedir.

EVA material used in the insole is absorbing shocks due to its closed cell structure.

Ceyo ürünlerinin büyük çoğunluğunda ayağın yapısına uygun hazırlanan ve doğal formunu koruyan özel anatomik taban tasarımı bulunmaktadır. Ayağın tabana temas eden arayüzünü artırarak, basınç noktalarındaki ağırlığı tabanın tüm yüzeyinde dağıtan, ayak ağrısı gibi şikayetleri azaltan özelliktedir.

Most of the Ceyo products have anatomical sole designs that are convinced in conformity with the foot structure, to keep its natural form. By increasing the contact points of the interface between the feet and the sole, the weight at pressure points is spread to a larger surface and thus foot pain or similar complaints are reduced.

Özel tasarımı tabandaki delikler suyun rahatça tahliyesini sağlar. Bu sayede ürün ve ayak çabuk kuruyarak, mantara neden olan nem ortadan kalkar, koku oluşumu engellenir.

Holes on the custom designed outsole enables the easy discharge of water. Thus the slipper and the feet dry quickly, the moisture causing fungus and hence the odor formation are prevented.

Tabanın üzerinde ayağa temas eden bölgede kullanılan EVA, antibakteriyel, darbe emici özelliklerde olup, kaymayan ve çabuk kuruyan iç taban malzemesi olarak tercih edilmiştir.

The EVA used in the insole is antibacterial, shock absorbing and preferred as a non-slip, quick-drying footbed material.

İç tabanda kullanılan EVA malzeme, kapalı hücre yapısı sayesinde darbeleri emmektedir.

EVA material used in the insole is absorbing shocks due to its closed cell structure.
